

Engineering/Design Capabilities

Design/Build

Evergreen Engineering is able to assist in all aspects of a design/build project ranging from selecting specific equipment to providing permit drawings to construction management. Our level of services is flexible and can be tailored to suit every project's specialized needs.

Services

- Provide Drafting Services
- Provide System Capacity Check and Construction Scope of Work
- Analyze Uniform Building/Mechanical Code
- Coordinate Closely with Architectural and Electrical Design Consultants
- New and Retrofit Installation
- General Contracting

Full-Service Capabilities

- Project Programming
- Feasibility Studies
- Preliminary and Final Engineering/Design
- Construction Cost Estimating
- Building Permit Acquisition
- Construction and Construction Management

Types of Projects

- Building Expansions
- HVAC Upgrades
- Boiler Installations and Design
- Subfab Cooling
- Air Handler Demo/Install
- Facility Buildings
- Plumbing
- Cleanrooms

Industries Served

- Semiconductor Manufacturing
- Semiconductor Manufacturing Support
- Original Equipment Manufacturing
- Biotech Laboratories
- Pharmaceutical Manufacturing and Pharmaceutical Laboratories
- Medical Supply Manufacturing
- Primary/Secondary Metals Manufacturing
- Light Industrial
- Heavy Industrial
- Electronic Assembly
- Research and Development Facilities
- Chemical Manufacturing
- Chemical Blending and Mixing Facilities
- Specialized "Commercial" Facilities
- Hazardous Material Storage Facilities
